

3D Printing Solutions For Dental Practices

FORM 3B+

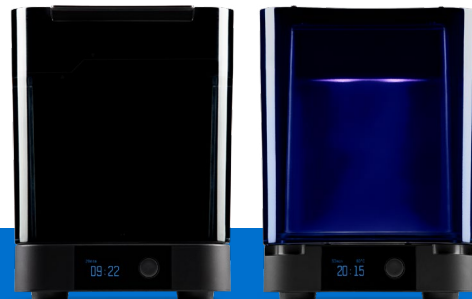

Work Smarter, Not Harder.

Rapidly produce accurate, high-quality dental models, appliances, and prosthetics with the Form 3B+, an advanced desktop 3D printer developed for dental professionals.

PREFORM AND DASHBOARD

Free, Powerful Software That's
Easy to Learn

FORM WASH AND FORM CURE

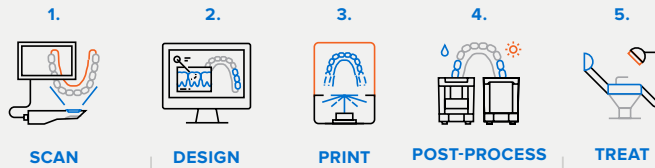

Automated Post-Processing Saves
Time and Effort

Why Go Digital?

A Smart Business Decision

The Digital Workflow

Fast, Accurate, Versatile

The Formlabs Ecosystem

Proven, Safe Solutions

Reduce the risks and uncertainties introduced by human factors. Deliver faster treatments, fewer visits, and higher prosthetic acceptance rates.

Improved Efficiency

Save time and costs. Reducing manual tasks means shorter appointments and increased throughput, while handling some production in-office cuts costs.

Ease of Use

Today's digital technology is reliable and intuitive. Advanced 3D printers have clever features like automatic resin dispensing so you can reclaim your time.

Flexible Communication

Improve relationships on all sides. Cut lab lead times with digital file transfer, and use your printer to plan or illustrate complicated cases to patients.

Fully Validated Indications

Fast, Accurate, Versatile

Crown and Bridge Models

\$2-4 USD per model

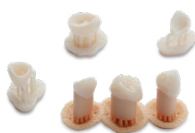

Orthodontic Models

\$2-3 USD per model

Diagnostic Models

\$4-6 USD per model kit

Temporary and Permanent Restorations

\$2-5 USD per unit

Occlusal Splints

\$4-5 USD per splint

Surgical Guides

\$2-6 USD per guide

Please note that workflows using biocompatible resins may not be available in all regions. Ask a sales representative about availability in your region.
